HERE WE GO!

This is my learning notebook of Microeconomic Theory I (Course number: ECON601 at USC Economics). As one of the core courses in an economic Ph.D. curriculum, Microeconomic Theory I is beyond important to my research. Therefore, I would love to use this notebook as a commitment mechanism, to document lecture notes, discuss session and office hour intuitions, reading summaries, my personal questions regarding the topics and more. By building a file from scratch, hopefull I could have a more systematic and sophisticated understanding on the content of this course.

I thank Prof. Jonathan Libgober at USC Economics for leading the discussion of the course and providing intuitive ways to understand microeconomic theory. Please check his webpage [here](#), he is such fun.

I also appreciate the time and effort my TA Qitong Wang put into this course, guiding me through discussing sessions and problem sets. When I have questions, he is always there to help.

Following the structure of the course, this notebook will cover three aspects of microeconomic theories: (a) individual decision making, (b) game theory, (c) mechanism design and contract theory. Apart from Jonathan's lecture notes, I will also summarize the reading materials, including: [Mas-Colell et al. \(1995\)](#)'s *Microeconomic Theory*, [Mailath \(2018\)](#)'s *Modelling Strategic Behavior*¹, [Fudenberg and Tirole \(1991\)](#)'s *Game Theory*, [Myerson \(1991\)](#)'s *Game Theory: Analysis of Conflicts*, [Bolton and Dewatripont \(2005\)](#)'s *Contract Theory*, [Mailath and Samuelson \(2006\)](#)'s *Repeated Games and Reputation* and [Osborne and Rubinstein \(1994\)](#)'s *A Course in Game Theory*. Other materials will also be referred to along the way.

Building this notebook is truly a memorable journey for me. I would love to share this review and all the related materials to anyone that finds them useful. And unavoidably, I would make some typos and other minor mistakes (hopefully not big ones). So I'd really appreciate any correction. If you find any mistakes, please send the mistakes to this email address saizhang.econ@gmail.com, BIG thanks in advance!

¹Latest version (May 2021) available [here](#).

Contents

I	Individual Decision Making	4
1	Utilities, Preferences and Choices	5
1.1	Set Theory and Space Theory	5
1.2	Chap1Sec2	5
1.3	Chap1Sec3	5
1.4	Chap1Sec4	5
2	Fundamentals of Consumer Theory	6
3	Lagrange Maximization and Duality	7
4	Monotone Comparative Statics	8
5	Expected Utility and Decisionmaking under Uncertainty	9
6	Aggregation and the Existence of a Representative Consumer	10
7	Producer Theory	11
8	Stochastic Choice	12
II	Game Theory	13
9	Nash Equilibrium and Bayesian Nash Equilibrium	14
10	Rationalizability and DOminant Strategies	15
11	Correlated Equilibrium	16
12	Dynamic Games and Refinements	17
13	Repeated Games/Folk Theorem	18
14	Recursive Methods in Repeated Games	19

III Mechanism Design and Contract Theory	20
15 Arrow's Theorem and Social Choice	21
16 Boundaries of the Firm and Coase's Theorem	22
17 Implementation Concepts	23
18 The Revelation Principle	24
19 Auctions and Optimal Auctions	25
20 Efficient Implementation	26
21 Moral Hazard	27
22 Full Implementation	28
Bibliography	29

Part I

Individual Decision Making

CHAPTER 1

UTILITIES, PREFERENCES AND CHOICES

Contents

1.1	Set Theory and Space Theory	5
1.2	Chap1Sec2	5
1.3	Chap1Sec3	5
1.4	Chap1Sec4	5

The first chapter summarizes

In Section 1.1, I summarize the basic elements of set theory,

1.1 Set Theory and Space Theory

something

1.2 Chap1Sec2

something

1.3 Chap1Sec3

1.4 Chap1Sec4

CHAPTER 2

FUNDAMENTALS OF CONSUMER THEORY

CHAPTER 3

LAGRANGE MAXIMIZATION AND DUALITY

CHAPTER 4

MONOTONE COMPARATIVE STATICS

CHAPTER 5

EXPECTED UTILITY AND DECISIONMAKING UNDER UNCERTAINTY

CHAPTER 6

AGGREGATION AND THE EXISTENCE OF A REPRESENTATIVE CONSUMER

CHAPTER 7

PRODUCER THEORY

CHAPTER 8

STOCHASTIC CHOICE

Part II

Game Theory

CHAPTER 9

NASH EQUILIBRIUM AND BAYESIAN NASH EQUILIBRIUM

CHAPTER 10

RATIONALIZABILITY AND DOMINANT STRATEGIES

CHAPTER 11

CORRELATED EQUILIBRIUM

CHAPTER 12

DYNAMIC GAMES AND REFINEMENTS

CHAPTER 13

REPEATED GAMES/FOLK THEOREM

CHAPTER 14

RECURSIVE METHODS IN REPEATED GAMES

Part III

Mechanism Design and Contract Theory

CHAPTER 15

ARROW'S THEOREM AND SOCIAL CHOICE

CHAPTER 16

BOUNDARIES OF THE FIRM AND COASE'S THEOREM

CHAPTER 17

IMPLEMENTATION CONCEPTS

CHAPTER 18

THE REVELATION PRINCIPLE

CHAPTER 19

AUCTIONS AND OPTIMAL AUCTIONS

CHAPTER 20

EFFICIENT IMPLEMENTATION

CHAPTER 21

MORAL HAZARD

CHAPTER 22

FULL IMPLEMENTATION
